flexboxfroggy.com

FLEXBOX FROGGY

Level 1 of 24

Welcome to Flexbox Froggy, a game where you help Froggy and friends by writing CSS code! Guide this frog to the lilypad on the right by using the **justify-content** property, which aligns items horizontally and accepts the following values:

- flex-start**: Items align to the left side of the container.
- flex-end**: Items align to the right side of the container.
- center**: Items align at the center of the container.
- space-between**: Items display with equal spacing between them.
- space-around**: Items display with equal spacing around them.

For example, **justify-content: flex-end;** will move the frog to the right.

```
1 #pond {
2   display: flex;
3   justify-content: flex-end; (Syed Mesum Zaidi)
4 }
5
6
7
8
9
10
```

FLEXBOX FROGGY

Level 2 of 24

Use **justify-content** again to help these frogs get to their lilypads. Remember that this CSS property aligns items horizontally and accepts the following values:

- flex-start**: Items align to the left side of the container.
- flex-end**: Items align to the right side of the container.
- center**: Items align at the center of the container.
- space-between**: Items display with equal spacing between them.
- space-around**: Items display with equal spacing around them.

```
1 #pond {
2   display: flex;
3   justify-content: center; (Syed Mesum Zaidi)
4 }
5
6
7
8

SyedMesumZaidi/Periodic-Tabl

Flexbox Froggy - A game for le

flexboxfroggy.com

FLEXBOX FROGGY

Level 3 of 24

Help all three frogs find their lilypads just by using `justify-content`. This time, the lilypads have lots of space all around them.

If you find yourself forgetting the possible values for a property, you can click on the property name to view them. Try clicking on `justify-content`.

```
1 #pond {
2   display: flex;
3   justify-content: space-around; (Syed Mesum Zaidi)
4 }
5
6
7
8
9
10
```

FLEXBOX FROGGY

Level 5 of 24

Now use `align-items` to help the frogs get to the bottom of the pond. This CSS property aligns items vertically and accepts the following values:

- `flex-start`: Items align to the top of the container.
- `flex-end`: Items align to the bottom of the container.
- `center`: Items align at the vertical center of the container.
- `baseline`: Items display at the baseline of the container.
- `stretch`: Items are stretched to fit the container.

```
1 #pond {
2   display: flex;
3   align-items: flex-end; (Syed Mesum Zaidi)
4 }
5
6
7
8
9
10
```

flexboxfroggy.com

FLEXBOX FROGGY

Level 20 of 24

The two properties **flex-direction** and **flex-wrap** are used so often together that the shorthand property **flex-flow** was created to combine them. This shorthand property accepts the value of the two properties separated by a space.

For example, you can use **flex-flow: row wrap** to set rows and wrap them.

Try using **flex-flow** to repeat the previous level.

```
1 #pond {
2   display: flex;
3   flex-flow: column wrap;      (Syed Mesum Zaidi)
4 }
5
6
7
8
9
10
```

Flexbox Froggy - A game for le

flexboxfroggy.com

FLEXBOX FROGGY

Level 21 of 24

The frogs are spread all over the pond, but the lilypads are bunched at the top. You can use `align-content` to set how multiple lines are spaced apart from each other. This property takes the following values:

- `flex-start`: Lines are packed at the top of the container.
- `flex-end`: Lines are packed at the bottom of the container.
- `center`: Lines are packed at the vertical center of the container.
- `space-between`: Lines display with equal spacing between them.
- `space-around`: Lines display with equal spacing around them.
- `stretch`: Lines are stretched to fit the container.

This can be confusing, but `align-content` determines the spacing between lines, while `align-items` determines how the items as a whole are aligned within the container. When there is only one line, `align-content` has no effect.

```
1 #pond {
2   display: flex;
3   flex-wrap: wrap;
4   align-content: flex-start;    (Syed Mesum Zaidi)
5 }
6
7
8
9
10
```
